Professional Experience

Pump Operator / IT

12/2018 - 03/2020

Regiment LLC - San Antonio, Texas

- Worked closely with project teams to identify operational issues quickly and keep jobs moving with minimal downtime.
- Adjusted plans and resources to meet changing field targets, staffing changes, and equipment requirements.
- Diagnosed and resolved most electrical and software-related equipment issues in field and shop environments.
- Maintained clean, organized work areas across shop and field locations to support safe, efficient execution.
- Stayed composed in high-pressure situations and delivered practical mechanical troubleshooting support when needed.

Pump Supervisor

09/2016 - 12/2018

Strait Line - Nordheim, Texas

- Prepared, calibrated, and monitored production equipment to maintain target output and consistent daily performance.
- Adjusted job assignments and crew schedules to match changing workload, customer requirements, and employee capability.
- Provided field leadership, set direction for daily operations, and maintained accountability for execution.

Coil Tubing Operator

05/2014 - 04/2016

Forbes Energy - Pleasanton, Texas

- Covered additional shifts as needed to meet customer schedules and operational demands.
- Used clear verbal communication to direct crews during shifts, build alignment, and keep work progressing efficiently.
- Prepared timely operating reports covering service unit activity and project progression.

Well Tester

04/2012 - 03/2014

Fesco - Alice, Texas

- Operated and positioned oil and gas well equipment for each stage of testing and completion activity.
- Monitored operating parameters to ensure installed equipment performed within specification.
- Supported and monitored well completion, evaluation, testing, and survey operations.

IT Technician

10/2010 - 04/2012

Select Energy Services - San Antonio, Texas

- Trained junior team members and end users on network tools and operating practices, improving support efficiency.
- Installed and repaired wiring, cabling, and devices to restore and optimize network performance.
- Configured hardware and software for stable, reliable network operation.
- Worked with vendors to source replacement components and resolve escalated technical issues.

Network Engineer

01/1999 - 10/2010

Alice Southern Equipment - Alice, Texas

- Identified opportunities to reduce and control expenses through cost, schedule, contract, and resource analysis.
- Monitored servers and escalated critical technical issues quickly to maintain uptime and service continuity.
- Performed security assessments and recommended improvements for disaster recovery, remote access, network appliances, servers, and directory services.
- Managed patching, backups, security changes, network configuration, server replacement, and software deployment and testing.

Education

3 Years of Computer Science Engineering

Texas A&M University - Corpus Christi - Corpus Christi, TX
